

The **Management of Adrenaline**, in view of the growing market demand for consolidated quality standards and the importance of prevention and commitment to environmental protection and safety at work, convinced of the internal improvements that can be achieved through the development of a culture of quality, environment and safety, has put in place an integrated management system that complies with **UNI EN ISO 9001:2015, UNI EN ISO 14001:2015 and UNI EN ISO 45001:2018 standards.**

*The **Management of Adrenaline** believes that a corporate management for Quality, Environment and Safety is indispensable through:*

- *the careful analysis of the business context and risks, aimed at seeking continuous opportunities for improvement;*
- *the continuous attention to customer satisfaction with punctual monitoring of customer satisfaction;*
- *commitment to environmental protection, including the prevention of pollution;*
- *the prevention of risks to workers' health and safety;*
- *the prevention of accidents and occupational diseases;*
- *compliance with the requirements of the product supplied and guarantees on the punctuality of the service;*
- *compliance with safety and environmental regulatory requirements;*
- *the commitment to continuous improvement in order to increase environmental and safety performance;*
- *the commitment to active participation and consultation by all the organisation's personnel;*
- *the pursuit of assiduous and constant collaboration with suppliers of materials and services in order to establish relationships marked by continuous growth;*
- *the accurate control of the phases of service provision also through continuous attention to technological innovation and the technical development of its resources;*
- *the care of professional growth for all company personnel;*
- *the increase in awareness among operating personnel of their contribution to the effectiveness of the management system;*
- *the continuous improvement of its management system to achieve ever higher levels of excellence through the definition and periodic review of quality, environmental and safety objectives;*
- *the development of new services that can better meet the customer's needs and can always guarantee punctual compliance with regulatory requirements;*
- *the effectiveness and efficiency of the company's own management system, also through a reduction in costs related to products and processes.*

The **Management of Adrenaline** is aware that the goal of quality assurance and respect for the environment and safety requires constant commitment from all staff and that it can only be successfully achieved through their full involvement.
